PROFESSIONAL SUMMARY

Results-driven Data Engineer specializing in scalable AWS and Azure cloud infrastructure. Expert in optimizing SQL queries and developing high-performance PySpark applications for large-scale data processing. Transforms business requirements into efficient data pipelines delivering actionable intelligence through distributed workflows and advanced ETL processes. Known for delivering production-grade data solutions and driving measurable performance improvements.

PROFESSIONAL EXPERIENCE

Database Developer, Tata Consultancy Services | *Mumbai, Maharashtra*

May 2025 - Present

- Designed and developed 10+ PL/SQL packages implementing complex business logic for BFSI client, supporting incremental data loads across critical financial modules.
- Refactored 20+ legacy procedures into modular PL/SQL packages, improving maintainability and reducing scan costs by 50% on large financial datasets.
- Optimized database performance by implementing strategic indexing on high-frequency transaction tables, reducing query execution time by 40%.
- Maintained 99.9% batch job success rate by proactively monitoring DBMS_SCHEDULER workflows in Production Environment.

Data Engineer, UST Global | *Trivandrum, Kerala*

Aug 2024 - Apr 2025

- Developed high-performance PySpark applications replacing 15+ legacy SQL procedures, reducing data processing time by 60% across distributed datasets.
- Orchestrated migration of 8 mission-critical SQL Server databases to Amazon RDS, implementing multi-region replication and automated backup strategies.
- Implemented an enterprise data lake architecture using AWS S3 and Glue Catalog, enabling structured and semi-structured data processing for analytics workloads.
- Designed Databricks workflows and visualizations to support business users in analyzing large datasets and generating actionable insights.

Software Engineer Intern, aiRender Technology | *Bangalore, Karnataka*

Jun 2022 - Oct 2022

- Worked on Shell Scripting to automate basic server tasks and assist in Janus WebRTC server setup and configuration.
- Gained hands-on experience with WebRTC packet flow by contributing to an in-browser video calling system.

EDUCATION

Amal Jyothi College of Engineering | *Kottayam, Kerala*

2020 - 2024

Bachelor of Technology in Computer Science and Engineering

- CGPA:** 9.32
- Achievements:** Winner – 2 National-Level Hackathons, Manager's Honour Award

Vartak College of Science and Technology | *Mumbai, Maharashtra*

2019 - 2020

Junior College - Science with Computer Science

- CGPA:** 9.06

TECHNICAL EXPERTISE

- Programming Languages:** Python, SQL, PL/SQL, T-SQL, Java, JavaScript, Shell Scripting
- Cloud Platforms — AWS:** AWS S3, AWS EMR, AWS Glue, AWS Redshift, AWS DynamoDB
- Cloud Platforms — Azure:** Azure Data Factory, Azure Synapse, Azure Cosmos DB, Azure Databricks
- Big Data Technologies:** Apache Spark, PySpark, Databricks, Hadoop, HDFS, Delta Lake, Parquet, Apache Airflow, Pandas, Terraform, Power BI, Tableau
- Data Engineering:** ETL/ELT Pipelines, Data Warehousing, Dimensional Data Modeling, Change Data Capture, Incremental Load Design, Batch & Stream Processing, GIT, Agentic AI

CERTIFICATIONS

- DP-203 - Microsoft Certified:** Azure Data Engineer Associate (Feb 2025)
- CS50P - Introduction to Programming with Python:** Harvard University (Dec 2021)
